PROFILE

Systems Analysis and Development student at SENAI with a solid foundation in programming logic and a strong ability to learn quickly. I have hands-on experience in the manufacturing sector, including graphic production and specialized CNC machinery operations, where I developed strong organization, communication, and teamwork skills. I enjoy solving problems and applying technologies such as Python and relational databases (SQL) to build efficient solutions.

EDUCATION

Technology Degree in Systems Analysis and Development

SENAI College, Taubate | In progress - expected completion in 2027

Higher education focused on software development, systems analysis, databases, web technologies, and applied computing.

High School Diploma

Colegio COTET, Taubate | Completed

Completed secondary education with a foundation that supports continued technical and professional development.

EXPERIENCE

Production Assistant - Graphic Printing Department

January 2026 - Present

Operate a Roland VS640 printer and provide technical support for Laser CNC and Router CNC machinery. Support graphic production workflows, helping maintain organization, output quality, and efficiency across the production line.

COURSES AND CERTIFICATIONS

Programming

SuperGeeks

Programming logic, foundational software development, basic project development, and information technology fundamentals.

Introduction to Modern AI

Cisco Networking Academy

Artificial intelligence and machine learning concepts, computer vision, machine translation, large language models, prompt engineering, and chatbots.

Networking Basics

Cisco Networking Academy

Network communication, protocols, Ethernet, IPv4 and IPv6 addressing, routers, and connectivity troubleshooting.

COURSES AND CERTIFICATIONS - CONTINUED

Linux Unhatched

[Cisco Networking Academy / NDG](#)

Linux command line, system navigation, file manipulation, scripts, users, permissions, and basic network configuration.

Data Analytics Essentials

[Cisco Networking Academy](#)

Data analysis, preparation and transformation, basic statistics, and practical use of Excel, SQL, Tableau, and related tools.

AWS Academy Graduate - Cloud Foundations

[AWS Academy](#)

Cloud computing fundamentals and the core concepts, architecture, security, and services of Amazon Web Services.

TECHNICAL AND PROFESSIONAL SKILLS

Programming Logic	MySQL / SQL Databases	Python
Front-End Development	Artificial Intelligence and ML	Prompt Engineering and LLMs
IPv4 / IPv6 Networking	Problem Solving	Data Analysis and Preparation
Excel, SQL, and Tableau	AWS Cloud Foundations	Laser / Router CNC Operation
Fast Learner	Communication and Organization	Teamwork

LANGUAGES

Brazilian Portuguese	Native
English	B1 - Intermediate
